

TCG 6223- COMPUTER GRAPHICS GUIDELINES FOR LAB ASSIGNMENT

Description

This assignment provides a hands-on experience in showing the methodology to solve the computer graphics problem with OpenGL. You are required to form a group of **4 persons**. Each group provides **1 set of answer** for the given question during labs session.

Your submission MUST provide the following items.

- design of solution using flowcharts with relevant explanation.
- screenshots of output simulation.
- screenshots of compiled successfully without error
- screenshots of full coding, including line numbers, library, all functions, main, etc.

BEWARE of Plagiarism

If you use a picture or more than a few words from a book or another source, you **must quote it and provide the source in APA citation format** and included in References. Failure to do so is considered plagiarism. Copying from other groups is also against the rules and counts as plagiarism.

Any instances of plagiarism will result in a score of ZERO.

MARKING RUBRICS

Description	Max (%)	Score (%)
PLAGIARISM	-20	
a) Design of solution using flowcharts with relevant explanation (2 marks for each criteria) - Introduction of problem - Description of the objective relevant to problem - Explanation on how you design the solution - Draw the flowcharts that match the objective - Describe each flowchart to match with the program/ coding - Limitations of the solution <i>** 0-fail 0.5-unsatisfactory 1-meet requirement 1.5-above requirement 2-excellent</i>	12	
b) Screenshots of output simulation (1 mark for each simulation) show output simulation in organized arrangement <i>** 0-fail 0.5-unsatisfactory 1-meet requirement</i>	4	

c) Screenshots of compiled successfully (1 mark for each criteria) • compiled without error • well-structured and organized arrangement <i>** 0-fail 0.5-unsatisfactory 1-meet requirement</i>	2	
d) Screenshots of full program, including line numbers, library, all functions, main, etc. (1 mark for each criteria) • show file naming, header, library, functions, main coding with line numbers • well-structured and organized arrangement <i>** 0-fail 0.5--meet requirement 1-excellent</i>	2	
TOTAL	20	

ENJOY YOUR TEAMWORK!
